

“Redmond’s first aid clay is a go-to ointment for my horses. I have applied it to cuts, scrapes and bruises on my horses with excellent results.”

Julie Goodnight
Horse trainer and clinician

Natural Healing

Redmond First Aid for Horses is an all natural, hydrated bentonite clay that promotes natural healing. It can be applied to sores, open wounds, skin irritations, burns, and bites. Redmond First Aid can also help draw out infection and prevent proud flesh. When applied, the clay acts as an antiseptic, seals the area, and keeps flies and bacteria out of the wound.

Ingredients:

Redmond brand montmorillonite clay
& purified water
